TRAFFIC SIGNAL IMPROVEMENT AT MAIN STREET AND 24TH AVENUE WEST

On Thursday, October 30, 2014, under contract with the City of Norman, Traffic and Lighting Systems will be working at the Main Street intersection at 24th Avenue West. After 9:00 a.m. on October 30th, the intersection may be temporarily controlled by an all-way STOP sign. Full signal operation should be restored at the intersection by 12:00 p.m. on the same day. The work to be done involves the extension of the existing mast arm controlling southbound traffic. The extension is necessary to be able to provide a second signal head for the existing dual left-turn lanes on the southbound approach currently served by only one signal head. Due to the nature of the work, lane closures may be necessary on the northbound and southbound approaches through the intersection. Traffic control will be provided by Traffic and Lighting Systems to guide motorists safely through this work zone.

Any questions about the project can be directed to Mr. David Riesland, City of Norman Traffic Engineer, at (405) 329-0528 or David.Riesland@NormanOK.gov.
